

Forklift

Freight

You?

Drivers, protect yourself from the hazards of falling freight while loading and unloading.

Stay away from your truck's trailer when a forklift loads or unloads freight.

If you must direct loading or unloading, have a plan with the forklift driver and a safe area to stand.

Take advantage of designated safe work areas or break rooms.

Visit www.KeepTruckingSafe.org for more information on how to reduce your risk to injury.
